

PREMIUM ZONE

AN EXCLUSIVE INSIDER GUIDE

Google AI Ecosystem Playbook

Discover the Hidden Tools, Features & Workflows inside the
Google AI Ecosystem

**Inside: a real ₹35,100 free Google AI subscription
with 5TB cloud storage — plus the tools, prompts,
and shortcuts most people never find.**

1 • Read This First

The short version: Jio user? Skip straight to Section 2 — you're sitting on a ₹35,100 free Google AI subscription most people never claim. Everything after that is bonus: hidden tools, real shortcuts, and free resources worth bookmarking.

This whole guide takes 10–15 minutes. No 40-page ebook energy, no theory — just the parts worth your time.

Who Are We?

Premium Zone is an exclusive community for AI enthusiasts, creators, students, entrepreneurs, and professionals who want to stay ahead in the rapidly evolving world of AI and technology.

Community Members receive:

-  Exclusive software deals and member-only offers
-  Free giveaways and limited-time promotions
-  The latest AI tools, updates, and hidden discoveries
-  Curated resources that are genuinely worth your time
-  Early access to new products and opportunities

Exclusive Buyer Bonus

As a thank you for purchasing this playbook, you've unlocked **lifetime access** to the Premium Zone Community at no additional cost.

2 • Claim Your Free 18-Month Google AI Pro

₹35,100 of Google AI Pro — free for 18 months.

If you're a Jio customer, you may be eligible to claim **Google AI Pro FREE for 18 months** — an official promotional offer worth ₹35,100.

This isn't a limited trial or a modified version. You'll receive the full Google AI Pro subscription with access to premium AI features, including **5 TB of Google Storage, Veo 3.1 video, a boosted AI Studio, Nano Banana Pro image generation, Deep Research, Gemini in Workspace, and more.**

It takes less than two minutes to check your eligibility and activate the offer.

THE 4 FEATURES PEOPLE ACTUALLY BUY THIS FOR

 **5 TB of storage** — enough for basically every photo, file, and email you'll ever have, forever

 **Veo 3.1 video generation** — 1,000 monthly credits to create real AI video, not a 3-second demo

 **AI Studio, supercharged** — your subscription raises your usage limits and unlocks extra models (like Nano Banana Pro) the free tier doesn't get

 **Nano Banana Pro** — Google's most talked-about image model right now, for studio-quality 4K images and edits

Eligibility Checklist

- ✓ You have an active **Jio prepaid or postpaid SIM**
- ✓ You're **18 years or older**
- ✓ You're on an **Unlimited 5G plan of ₹349/month or above**
- ✓ You haven't already redeemed this offer using the same Jio number
(one redemption per eligible number)

What You Actually Get (18 Months, Free)

Included	Detail
★ Cloud storage	5 TB across Google Photos, Drive, and Gmail
★ Video generation	Veo 3.1 (1000 monthly credits)
★ AI Coding & App Creation	AI Studio with higher usage limits + extra models (like Nano Banana Pro) unlocked for subscribers
★ Image generation & editing	Nano Banana Pro — Google's flagship image model, studio-quality 4K output
Full Gemini model access	Extended access to latest Gemini models
Research assistant	Deep Research with 5× higher limits
Workspace integration	Gemini built directly into Gmail, Docs, and Sheets

How to Claim It (3 Steps)

1. Open the **MyJio app** and log in.
2. Look for the **Google Gemini offer banner** on your home screen.
3. Tap it, and register using your **Gmail ID** to activate the subscription.

That's it — no forms, no waiting period, no separate Google sign-up.

DONE FOR YOU

Not a Jio user? Or don't want to pay a higher monthly recharge just to get the benefits? Just WhatsApp us "**Gemini**" on **+91 9416396336** — we'll activate it for you, at a very low one-time price. No troubleshooting required on your end.

WhatsApp +91 9416396336

JOIN THE COMMUNITY

This offer's terms can change with zero notice from Google or Jio.

The fastest place to hear about it — plus every other free AI deal we find — is our WhatsApp community. This is genuinely how we keep this guide from going stale; join once, benefit for as long as you use Gemini.

PART TWO

The Bonus Section

You've already claimed the ₹35,100 offer above. Everything from here is bonus — the hidden tools, shortcuts, and free resources that make the subscription worth using every day.

Bonus 1 • Choosing the Right Gemini Plan

Not eligible for the Jio offer, or want to know what's beyond it? Here's the honest breakdown — no plan pushed harder than it deserves.

Plan	Roughly for	The one thing that matters
Free	Casual, everyday use	Gemini 2.5 Flash + limited 2.5 Pro, Deep Research, Gemini Live, Canvas, and Gems are all included for free — most people never need to pay at all
AI Plus	Light storage needs	Cheapest paid step up, mainly extra Google storage (400GB) — skip it if you got the Jio offer , you already have more
AI Pro	Power users, students, side-hustlers	Gemini 3.1 Pro with a 1M-token context window, 5TB storage, Veo video, and the AI Studio
AI Ultra (two tiers)	Heavy daily users, professionals	Same as Pro at 5x–20x the limits — only worth it if you're genuinely capped out

Upgrade if: you're hitting daily caps on Free, you need the 1M-token window for huge documents, or you specifically want Veo/Jules.

Skip it if: you already redeemed the Jio offer — you have AI Pro-level access for 18 months already.

Bonus 2 • Hidden Google AI Gems

These all ship inside a normal Gemini/Google account. Almost nobody opens them because Google buries them outside the main chat interface.

Google AI Studio — aistudio.google.com

Google's free developer playground: test every Gemini model, prototype mini AI apps, zero setup, zero credit card. Looks "technical," so most casual users skip it — but it's open to anyone curious, not just developers.

With your AI Pro subscription, you also get higher usage limits and access to extra models (like Nano Banana Pro) that free-tier users don't see.

 **How to access:** Go to aistudio.google.com and sign in with your Google account. Pick a model from the dropdown and start chatting or building.

Open aistudio.google.com ↗

Nano Banana Pro (image generation)

Google's flagship image model, and easily the most talked-about AI image tool right now — studio-quality 4K output, near-perfect text rendering inside images, and edits that actually respect the original photo. Free users get a small daily quota; your AI Pro subscription bumps that limit up considerably. Most people only know it as "that image thing" without realizing it's built directly into Gemini.

 **How to access:** Open gemini.google.com → tap **Create images** (or choose the **Thinking/Pro** model) → describe or upload a photo to edit. Also available in AI Studio.

[Open gemini.google.com](https://gemini.google.com) ↗

Veo (video generation)

Turns a text prompt into a real AI-generated video clip — genuinely usable now, not a gimmick. Your Google AI Pro subscription includes **Veo 3.1 with 1,000 monthly credits**, enough to actually create content regularly instead of just testing it once. Hidden behind an easy-to-miss "Video" button in the prompt bar.

 **How to access:** Open gemini.google.com → tap the **Video** button in the prompt bar. For longer, scene-by-scene control use **Google Flow**.

[Open gemini.google.com](https://gemini.google.com) ↗

[Open labs.google/fx/tools/flow](https://labs.google/fx/tools/flow) ↗

Gemini Canvas

A side-panel workspace for writing and live-editing code — the standout trick is turning a photographed whiteboard sketch into a working app. One click away, but easy to never notice if you only ever type-and-send.

 **How to access:** In **gemini.google.com**, tap **Canvas** under the prompt bar (or the **+ / Tools** menu on mobile), then type your request.

[Open gemini.google.com](https://gemini.google.com) ↗

Gems

Save a custom AI assistant once — name, instructions, reference files — and reuse it forever instead of re-explaining context every chat. Free on every plan, including Free, yet most people never even open "Explore Gems" in the side panel.

 **How to access:** In **gemini.google.com** → side panel → **Explore Gems** → **New Gem**. Add a name, instructions and (optionally) files, then save.

[Open gemini.google.com](https://gemini.google.com) ↗

NotebookLM — notebooklm.google.com

A research assistant that only answers from documents *you* upload, citing its source every time — so it never makes things up. It lives at a separate URL from the main Gemini app, which is exactly why most Gemini users have never heard of it.

 **How to access:** Go to notebooklm.google.com (or the NotebookLM app) → **New notebook** → upload PDFs, links or notes.

[Open notebooklm.google.com](https://notebooklm.google.com) ↗

Opal — opal.withgoogle.com

A no-code builder from Google Labs for chaining prompts, models, and tools into a working AI mini-app — describe what you want, and it builds it. Newer and far less known than Canvas, but purpose-built for stringing together multi-step AI workflows instead of one-off chats.

 **How to access:** Go to opal.withgoogle.com, sign in with Google, and describe the mini-app you want. Availability of Google Labs tools can vary by country.

[Open opal.withgoogle.com](https://opal.withgoogle.com) ↗

Google Antigravity – antigravity.google

Google's "agent-first" coding environment. Instead of just suggesting lines of code, you give AI agents a task ("build a landing page and test it") and they plan, write code, run it in a browser, and show you what they did. Built around Gemini, and a big step up from copy-pasting code out of chat. Great for non-coders who want to build real projects, too.

 **How to access:** Download the free desktop app from antigravity.google (Windows, Mac, Linux) → install → sign in with your Google account. It runs on your computer, not in the browser. Usage limits depend on your plan, and its availability may change.

[Open antigravity.google](https://antigravity.google) ↗

Pomelli – labs.google.com/pomelli

Google Labs' free AI marketing assistant. Paste your website link and it learns your brand — colours, fonts, tone of voice — then creates on-brand social posts, ad creatives, product photos and short animated videos. Built for small businesses, and a huge time-saver if you run one or freelance for one.

 **How to access:** Go to labs.google.com/pomelli, sign in with Google, paste your website URL to build your "Business DNA", then pick a campaign idea. Free during the beta; works in English only.

[Open labs.google.com/pomelli](https://labs.google.com/pomelli) ↗

Stitch — stitch.withgoogle.com

Describe an app or website screen in plain words (or upload a sketch) and Stitch designs it for you, with the code behind it. Export to Figma, or carry on building in AI Studio or Antigravity. No design skills needed.

 **How to access:** Go to **stitch.withgoogle.com**, sign in with Google, and type a prompt describing the screen you want. Free, and runs right in your browser.

[Open stitch.withgoogle.com](https://stitch.withgoogle.com) ↗

I DIDN'T KNOW THAT

Google used to run a separate experimental "Project Mariner" AI agent that browsed the web on its own. It was shut down in mid-2026 — not because it failed, but because its capabilities were folded straight into **Gemini Agent** and Chrome's built-in AI features. The idea didn't die, it just moved into tools you may already have.

Bonus 3 • 15 Things Gemini Can Do That Most People Never Use

Image Creation

#	What it can do	Real-world example
1	Generate or edit an image (Nano Banana Pro)	Create a minimalist coffee-brand logo from scratch, or remove the background from an existing product photo — same tool does both

Video Creation

#	What it can do	Real-world example
2	Generate a short AI video clip (Veo 3.1)	Turn a one-line concept into a 5-second video, complete with synced audio, for a social post

3	Summarize any video instantly	Paste a YouTube link, get a transcript, summary, or chapter-by-chapter breakdown
---	-------------------------------	--

Coding & Building

#	What it can do	Real-world example
4	Debug or explain code	Paste an error message and your code, ask what's actually wrong
5	Turn a sketch into a working app (Canvas)	Photograph a whiteboard wireframe, get a clickable prototype
6	Build a custom "Gem" assistant	A Gem that always replies in your brand's tone for social captions

Documents & Data

#	What it can do	Real-world example
7	Read and summarize a PDF you upload	Drop in a 40-page rental agreement, ask "what are the 3 riskiest clauses?"
8	Analyze a spreadsheet you upload	Ask it to spot trends or errors in a CSV export without opening Sheets
9	Compare two documents	Upload two contract drafts, ask exactly what changed between them
10	Search Gmail/Drive/Docs directly	"Find the invoice email from last month with the PDF attached"

Research & Voice

#	What it can do	Real-world example
11	Do multi-step "Deep Research"	Ask a broad question, get a cited, multi-source report — not just one answer
12	Generate an audio "podcast" from your notes	NotebookLM turns your source documents into a two-host audio discussion
13	Live voice conversation (Gemini Live)	Talk through a problem out loud instead of typing, hands-free

Everyday Shortcuts

#	What it can do	Real-world example
14	Generate a Slide Deck from raw notes	Paste a messy meeting doc, ask for a 6-slide summary deck
15	Pull in live results with @ Extensions	Type @YouTube , @Maps , or @Flights inline to pull real results straight into your chat

Bonus 4 · Prompting in 5 Minutes

Skip the 200-prompt "cheat sheet" PDFs — they go stale, and most of the prompts in them are filler. Learn **one framework** instead.

The Framework: R-T-A-F

- ☐ **R — Role:** Who should Gemini act as? (*"Act as a senior editor..."*)
- ☐ **T — Task:** What exactly do you want done? (*"...rewrite this paragraph..."*)
- ☐ **A — Audience/Angle:** Who's it for? (*"...for a non-technical reader..."*)
- ☐ **F — Format:** What should the output look like? (*"...as 3 bullet points, under 40 words each."*)

Weak prompt: "Write about productivity."

R-T-A-F version: *"Act as a productivity coach. Rewrite my messy to-do list into 3 prioritized tasks for tomorrow, for someone with only 2 hours of focus time, formatted as a short checklist."*

Same request — but now Gemini knows the role, the job, the reader, and the shape of the answer instead of guessing at all four.

Want more? Don't rely on a static prompt list — see the curated prompt libraries in Bonus 6, which stay actively maintained instead of going stale.

JOIN THE COMMUNITY

We test and re-share the prompts that actually hold up in our WhatsApp community — instead of dumping an untested list here that's outdated in three months.

WhatsApp Us

Bonus 5 • Direct Links to Every Google AI Tool

One page, every official link — bookmark this instead of hunting for URLs each time.

Tool	What it's for
Gemini gemini.google.com	Your everyday AI chat, image/video generation, Gems Open ↗
AI Studio aistudio.google.com	Developer playground — test models, prototype apps, higher limits for subscribers Open ↗
Google Flow labs.google/fx/tools/flow	AI filmmaking studio — Veo 3.1 + Nano Banana in one unified workspace Open ↗
NotebookLM notebooklm.google.com	Source-grounded research assistant Open ↗
Jules jules.google.com	Autonomous coding agent — assign it a task, get a pull request back Open ↗

Tool	What it's for
Pomelli labs.google.com/pomelli	AI marketing — on-brand posts, ads and videos from your website link Open ↗
Stitch stitch.withgoogle.com	Describe an app or website screen, get the design and code Open ↗
Antigravity antigravity.google	Agent-first coding app — AI agents plan, build and test projects for you Open ↗
Opal opal.withgoogle.com	No-code builder for AI mini-apps Open ↗

I DIDN'T KNOW THAT

Google used to run two separate tools called **Whisk** and **ImageFX**. Both were retired in 2026 and folded directly into **Google Flow** — that's where they actually live now.

For official docs and feature announcements:

[Gemini Help ↗](#)

[Google Blog: Gemini ↗](#)

Bonus 6 · Free Prompt Libraries & Resources

Don't rely on a static prompt dump — these stay actively maintained, so they're worth bookmarking instead of copying from.

Resource	Why it's worth bookmarking
youmind.com/prompts	Actively maintained prompt collection, not a stale one-time list
promptstochek.com	Searchable prompt library across many use cases
flowgpt.com	One of the largest free, community-submitted prompt libraries across every category
prompthero.com	The best free library specifically for image-generation prompts — pairs perfectly with Nano Banana Pro
learnprompting.org	Free — teaches you to write your own prompts instead of just copying templates

JOIN THE COMMUNITY

Resource lists rot fast — links die, tools get discontinued, better ones launch. We keep this list current inside our WhatsApp community. Consider this page a snapshot; the community is the living version.

Join the WhatsApp Community

WhatsApp Us

Bonus 7 • AI Productivity Stack

Gemini is strong, but no single tool does everything best. Pair it with:

Category	Pairs well with Gemini because...
Images	Nano Banana Pro for fast concepts; a dedicated image tool for fine-grained style control
Video	Veo/Flow for quick concept clips; a traditional editor for precise cuts and captions
Coding	AI Studio or Stitch to prototype fast; Antigravity or Jules for bigger, multi-step builds
Writing	Canvas for drafting/iteration, then a dedicated grammar/style tool for final polish
Research	NotebookLM for source-grounded research; Deep Research for open-web questions
Presentations	NotebookLM Slide Decks or Canvas for a first draft; a dedicated slides tool for final polish
Marketing	Pomelli for on-brand social posts and ads from a website link; a scheduling tool to publish them
Automation	Gemini for the "thinking" (drafting, summarizing); a workflow tool for the "doing"

The pattern: Gemini is your default first stop for *thinking, drafting, and researching* — bring in a specialist only for the final-mile polish.

Bonus 8 • Ways to Earn With This Stack

No hype, no "get rich quick" — just how people are genuinely using these tools to make money right now:

- **AI visual content for local businesses** — Nano Banana Pro produces professional-looking product photos and social graphics in minutes. Real demand exists for this on Fiverr/Instagram outreach to small businesses that can't afford a designer.
- **Short-form video for brands** — Veo 3.1 (via Flow) generates ad clips and social videos with synced audio, no camera or editing rig needed. Offer it as a lightweight "AI video ads" service.
- **Rapid app & automation builds** — AI Studio, Canvas, Stitch, Antigravity, and Jules let you build and ship small tools fast. Freelance "build me a simple app/automation" gigs, or use it to save hours in your own business.
- **Social media content for small businesses** — Pomelli builds on-brand posts, ad creatives and short videos from just a website link. Offer monthly content packs to local shops, clinics and restaurants.
- **Research & content services** — NotebookLM and Deep Research speed up anything research-heavy: reports, competitor analysis, literature reviews. Package the output as a paid service.

The honest version: this isn't a shortcut to riches — it's a genuine speed and cost advantage. You can now offer services that used to require a designer, videographer, or developer, in a fraction of the time.

Bonus 9 · Quick Wins — Do This Right Now

- ☐ Confirm your Jio eligibility and claim the 18-month offer (*Section 2*)
- ☐ Turn on Gmail's **Smart Features** (Settings → General → Smart Features) — without this, Gemini can't search your inbox at all
- ☐ Set your **Custom Instructions** once (Settings → Instructions for Gemini) so every new chat already knows who you are
- ☐ Open **aistudio.google.com** once, just to see what's there
- ☐ Try generating one image with **Nano Banana Pro**
- ☐ Paste a website link into **Pomelli** and see the campaign ideas it creates
- ☐ Build your first custom **Gem** for a task you repeat often
- ☐ Try **NotebookLM** with one real document you actually need to study
- ☐ Rewrite one recent prompt using **R-T-A-F** and compare the outputs
- ☐ Bookmark the 2 resource links you'll actually revisit
- ☐ Decide: free plan, or do you genuinely hit limits that justify paying?

DONE FOR YOU

Still haven't activated your Google AI Pro subscription? WhatsApp us "**Gemini**" on **+91 9416396336** — we'll get it done for you, at a very low one-time price.
